

# The 2020 Pandemic

It started in the East  
Has now engulfed the West  
This virus is not choosy  
And has even hurt the best  
From all the other nations  
And all the populations  
Want to help the situations.  
The world has come together  
To find a rapid cure  
And make more ventilators  
And PPE I'm sure.  
The hospitals and care homes  
And supermarkets too  
Are staffed by wonderful people  
Looking after me and you.  
Let's hope these awful problems  
Will soon come to an end  
Before we all go loopy  
And end up 'round the bend'  
The isolation is so boring  
Finding things that we can do?  
Telephone our friends  
And bore them rigid too!  
If only friends and family  
Could mingle everywhere  
Then this could make our dull lives  
Much easier to bear.  
But we will all get through this  
Of that there is no doubt  
And we can then all celebrate  
With love, laughter and a SHOUT!!

**Brenda Ridd**
