

Pandemic Positives!

Stay at home, protect the NHS, save lives,
Wash your hands, follow the science,
Bend the curve; get over the peak!
Slogans imprinted on our minds!

Pandemics are a once in a hundred years event,
But to get through this one, billions must be spent.
And repaid! Even so until a vaccine is found
We can't be sure,
That we and future generations will have a cure.

For now, we can only be thankful for some
Positive outcomes.
People kinder and more caring,
One another's grief now sharing.
And for us 'oldies' (three score years and ten),
More time to remember,
Loved ones we will meet again.
